We are now so accustomed to instant things: from our messages down to our meals, we try to spend as little time as possible in preparing the things that we need. There is nothing wrong with that, in fact, it's very practical and very convenient. But the drawback is, sometimes we do not maintain the good quality we need.

A perfect example is the way we gravitate towards fast food meals. Instead of treating them as indulgences, they become an integral part of our everyday life, a habit which is a far cry from healthy living considering the amount of preservatives that fast food meals have.

Electric pressure cooker meals are perfect for those who do not have the "talent" in cooking. They will also be heaven-sent for those who have less time for meal preparation. If you are one of these people that want more time but want tastier, quicker and healthier meals, then this is the book for you!
