MATLAB Simulations for Radar Systems Design

Bassem R. Mahafza, Atef Elsherbeni

MATLAB Simulations for Radar Systems Design Bassem R. Mahafza, Atef Elsherbeni

Simulation is integral to the successful design of modern radar systems, and there is arguably no better software for this purpose than MATLAB. But software and the ability to use it does not guarantee success. One must also:

- Ö Understand radar operations and design philosophy
- Ö Know how to select the radar parameters to meet the design requirements
- Ö Be able to perform detailed trade-off analysis in the context of radar sizing, modes of operation, frequency selection, waveforms, and signal processing
- Ö Develop loss and error budgets associated with the design

MATLAB Simulations for Radar Systems Design teaches all of this and provides the M-files and hands-on simulation experience needed to design and analyze radar systems. Part I forms a comprehensive description of radar systems, their analysis, and the design process. The authors' unique approach involves a design case study introduced in Chapter 1 and followed throughout the text. As the treatment progresses, the complexity increases and the case study requirements are adjusted accordingly. Part II presents a series of chapters-some authored by other experts in the field-on specialized radar topics important to a full understanding of radar systems design and analysis.

A comprehensive set of MATLAB programs and functions support both parts of the book and are available for download from the CRC Press Web site.

From reader reviews:

Antione Wilson:

With other case, little folks like to read book MATLAB Simulations for Radar Systems Design. You can choose the best book if you like reading a book. Given that we know about how is important a new book MATLAB Simulations for Radar Systems Design. You can add know-how and of course you can around the world by a book. Absolutely right, simply because from book you can recognize everything! From your country until eventually foreign or abroad you will be known. About simple matter until wonderful thing you may know that. In this era, we can open a book or even searching by internet product. It is called e-book. You may use it when you feel bored to go to the library. Let's learn.

Nancy Samuel:

In this 21st one hundred year, people become competitive in each and every way. By being competitive now, people have do something to make these people survives, being in the middle of the actual crowded place and notice by surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yeah, by reading a reserve your ability to survive raise then having chance to stand than other is high. In your case who want to start reading a new book, we give you this MATLAB Simulations for Radar Systems Design book as starter and daily reading book. Why, because this book is greater than just a book.

Shirley Morales:

The knowledge that you get from MATLAB Simulations for Radar Systems Design will be the more deep you rooting the information that hide within the words the more you get interested in reading it. It does not mean that this book is hard to understand but MATLAB Simulations for Radar Systems Design giving you joy feeling of reading. The article author conveys their point in selected way that can be understood simply by anyone who read it because the author of this publication is well-known enough. This kind of book also makes your personal vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this kind of MATLAB Simulations for Radar Systems Design instantly.

Laura Thibodeau:

People live in this new day time of lifestyle always make an effort to and must have the extra time or they will get lot of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely indeed. People is human not really a robot. Then we inquire again, what kind of activity do you have when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the book you have read is usually MATLAB Simulations for Radar Systems Design.
