Early Childhood Mathematics (5th Edition) Susan Sperry Smith

Early Childhood Mathematics, Fifth Edition is the most widely used guide for educators on teaching mathematics to young children in *Kindergarten* through *Third Grade*. Practical and applied, this trusted and research-based book encourages teachers and teacher candidates to create an active learning environment that fosters curiosity, confidence, and persistence in children learning mathematics. Expert author, Susan Sperry Smith relies heavily on the most current research in the field, aligns core content to the NCTM Standards, presents information on Cognitive Guided Instruction (CGI) and necessary adaptations for students with special needs. The book covers the most important key concepts for teaching math in the early years with three over-arching themes: knowledge of important mathematical relationships, number sense, and the ability to solve problems. The fifth edition builds on the reliability and excellency of previous editions with new information on meeting the educational needs of all students, the importance of STEM careers beginning in early childhood education, more activities, thematic unit, and curricular tools, multicultural literature and activities, a comprehensive update on The Common Core State Standards, NAEP, and the new DAP Position Statement.

From reader reviews:

Ronald Stallings:

Spent a free time for you to be fun activity to complete! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, about to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could be reading a book is usually option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to consider look for book, may be the reserve untitled Early Childhood Mathematics (5th Edition) can be good book to read. May be it is usually best activity to you.

Audrey Patton:

Playing with family in the park, coming to see the coastal world or hanging out with good friends is thing that usually you have done when you have spare time, and then why you don't try thing that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Early Childhood Mathematics (5th Edition), you are able to enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't have it, oh come on its known as reading friends.

Shirley Nichols:

As we know that book is important thing to add our understanding for everything. By a publication we can know everything we would like. A book is a list of written, printed, illustrated as well as blank sheet. Every year was exactly added. This book Early Childhood Mathematics (5th Edition) was filled with regards to science. Spend your spare time to add your knowledge about your technology competence. Some people has several feel when they reading the book. If you know how big benefit from a book, you can feel enjoy to read a publication. In the modern era like currently, many ways to get book which you wanted.

Thomas O'Brien:

What is your hobby? Have you heard that will question when you got students? We believe that that query was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you also know that little person like reading or as looking at become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You will find good news or update regarding something by book. Amount types of books that can you decide to try be your object. One of them is Early Childhood Mathematics (5th Edition).
