Case-based for most effective learning and retention, Bouncebacks helps emergency physicians sharpen their analytical skills to improve patient safety. The illustrative cases educate emergency physicians in documentation, risk management, and evaluation and management of common ED complaints and diagnoses.

Although patients in these cases were not entirely mismanaged, often important "red flags" were missed or ignored. The cases are structured for most learning impact: documentation of initial visits; Greg Henry, MD, FACEP (past president of ACEP) comments on evaluation and documentation from medical and risk management perspectives; final ED visits, diagnosis and hospital/surgical courses; and national experts' referenced discussions of appropriate ED approaches to diagnosis and management.

Goals include patient safety, continuing education in documentation, risk management, and discussion on evaluation and management of common ED complaints and diagnoses.
