**The Software Interface Between Copyright and Competition Law (Information Law Series)** Ashwin van Rooijen

The success of computer programs often depends on their ability to interoperate or communicate with other systems. In proprietary software development, however, the need to protect access to source code, including the interface information necessary for interoperability, is of vital importance. This apparent conflict gives rise to a complex interaction between copyright law and competition law, as the strong need for interoperability in computer programs affects both innovation and competition. This important book offers the first in-depth analysis of the current respective copyright and competition law approaches to interoperability.

With respect to copyright law, the book offers an in-depth analysis of how copyright law has been applied to computer programs, how this form of protection affects interoperability, and how the European Software Directive including its interpretation by courts in Member States, aims to facilitate interoperability.

With respect to competition law, the author critically analyzes the application of Article 102 of the TFEU to refusals to supply interface information, including a discussion on the tension between copyright and competition law. The author also examines the substantial body of U.S. case law and accompanying literature on the interplay between copyright law, software and interoperability. Based further on a comparison with relevant ex-ante interconnection rules in European design protection law and telecommunications law, the author advances several recommendations aimed at facilitating interoperability in software copyright law. Three interrelated approaches combine to convey an integrated and immediately accessible understanding of the subject:

- how interoperability affects the balance between innovation and free competition in software
- which of two regimes, copyright law or competition law, should primarily be concerned with striking this balance as affected by interoperability; and
- which particular instruments are suitable to approach this problem within these respective regimes.

Because of the in-depth analysis of the software interoperability problem with related legal disciplines in both Europe and the United States, and due to the clarity of the presentation, this will be welcomed as a valuable resource by practitioners, jurists, and academics concerned with copyright protection of computer software, interoperability and the interaction between copyright and competition law.

### **From reader reviews:**

#### **Jennifer Carter:**

What do you concerning book? It is not important together with you? Or just adding material when you really need something to explain what yours problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have free time? What did you do? Every person has many questions above. They must answer that question because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is proper. Because start from on jardín de infancia until university need this specific The Software Interface Between Copyright and Competition Law (Information Law Series) to read.

#### **Sheila Lefevre:**

This The Software Interface Between Copyright and Competition Law (Information Law Series) are generally reliable for you who want to be considered a successful person, why. The explanation of this The Software Interface Between Copyright and Competition Law (Information Law Series) can be one of many great books you must have will be giving you more than just simple reading through food but feed you with information that possibly will shock your before knowledge. This book will be handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed types. Beside that this The Software Interface Between Copyright and Competition Law (Information Law Series) giving you an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we know it useful in your day exercise. So , let's have it and luxuriate in reading.

#### **April Hall:**

Reading a e-book can be one of a lot of exercise that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new facts. When you read a publication you will get new information due to the fact book is one of various ways to share the information or maybe their idea. Second, studying a book will make anyone more imaginative. When you examining a book especially tale fantasy book the author will bring you to definitely imagine the story how the personas do it anything. Third, you are able to share your knowledge to other individuals. When you read this The Software Interface Between Copyright and Competition Law (Information Law Series), you may tells your family, friends and also soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a publication.

#### **Michael Larose:**

The Software Interface Between Copyright and Competition Law (Information Law Series) can be one of your beginning books that are good idea. All of us recommend that straight away because this e-book has good vocabulary that will increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The copy writer giving his/her effort to set every word into delight

arrangement in writing *The Software Interface Between Copyright and Competition Law (Information Law Series)* although doesn't forget the main point, giving the reader the hottest and based confirm resource info that maybe you can be considered one of it. This great information can drawn you into brand new stage of crucial considering.
