They also investigate the psychology and the thinking processes involved in chess, discuss the impact of chess-playing computers, and close with an imaginative and light-hearted preview of chess in the third millennium. The famous Soviet chess grandmaster Bronshtein and PhD Smolyan wrote a book on reflection about chess, their high moral and aesthetic purpose, on the prospects for the development of chess art. The authors argue for such chess, which are able to "give joy intelligent communication and bright creative experiences."
