Material Synthesis: Fusing the Physical and the Computational (Architectural Design)

Material Synthesis: Fusing the Physical and the Computational (Architectural Design)

Material Synthesis: Fusing the Physical and the Computational Guest-edited by Achim Menges

A new understanding of the material in architecture is fast emerging. Designers are no longer conceiving of the digital realm as separate from the physical world. Instead computation is being regarded as the key interface for material exploration and vice versa. This represents a significant perceptual shift in which the materiality of architecture is no longer seen to be a fixed property and passive receptor of form, but is transformed into an active generator of design and an adaptive agent of architectural performance. In stark contrast to previous linear and mechanistic modes of fabrication and construction, materialisation is now beginning to coexist with design as explorative robotic processes. This represents a radical departure from both the trite modernist emphasis on 'truth to materials' and the dismissal of materials by the previous generation of digital architects.

The issue features designers, researchers and thinkers that are at the forefront of exploring new modes of material enquiry and its deep interrelationship with technology, biology and culture. Through their work, which unfolds from multifaceted alliances between the fields of design, engineering and natural sciences, it seeks to trace the emergence of a novel material culture in architecture.

- Architectural and engineering contributors include: Sean Ahlquist, Martin Bechthold, Philippe Block, Karola Dierichs, Jan Knippers, Achim Menges, Neri Oxman, Steffen Reichert and Tobias Schwinn.
- Scientific and philosophical perspectives provided by: Mario Carpo, Manuel De Landa, Neil Gershenfeld and Thomas Speck.
- Features the design research of: Harvard's Material Processes and Systems Group, MIT's Mediated Matter Group and Stuttgart University's Institute for Computational Design.

From reader reviews:

Joe Dix:

The book *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)* can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the great thing like a book *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)*? Wide variety you have a different opinion about e-book. But one aim which book can give many data for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or information that you take for that, it is possible to give for each other; you can share all of these. Book *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)* has simple shape however, you know: it has great and large function for you. You can search the enormous world by start and read a publication. So it is very wonderful.

Maria Kim:

The knowledge that you get from *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)* is the more deep you looking the information that hide in the words the more you get thinking about reading it. It does not mean that this book is hard to understand but *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)* giving you excitement feeling of reading. The article writer conveys their point in certain way that can be understood by simply anyone who read the idea because the author of this e-book is well-known enough. This specific book also makes your personal vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this specific *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)* instantly.

Mary Brown:

Reading a e-book can be one of a lot of pastime that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new info. When you read a publication you will get new information simply because book is one of a number of ways to share the information or perhaps their idea. Second, reading a book will make you more imaginative. When you reading through a book especially tale fantasy book the author will bring someone to imagine the story how the character types do it anything. Third, it is possible to share your knowledge to other people. When you read this *Material Synthesis: Fusing the Physical and the Computational (Architectural Design)*, you may tells your family, friends and also soon about yours reserve. Your knowledge can inspire average, make them reading a e-book.

Tanya Wilson:

Is it anyone who having spare time and then spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This *Material Synthesis: Fusing the Physical and the*

Computational (Architectural Design) can be the solution, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these ebooks have than the others?
