Spectacular Galapagos

Tui De Roy

Spectacular Galapagos Tui De Roy

Over millions of years the story of the Galapagos has been one of birth, death, and rebirth, as volcanoes rise above the "hot spot" only to crumble back into the sea and be replaced by new ones. This cycle has given way to a "magic web" where antediluvian dragons sleep alongside gull chicks and, in the sun-baked interiors, gigantic cacti become the only source of moisture for birds and animals. These islands inspired Charles Darwin's theory of evolution when he explored them aboard the HMS Beagle in 1835.

A pairing of spectacular photographs and insightful text by the award-winning author explores this unique island setting, a collection of animals and an environment unparalleled anywhere on earth.
